

```
def simpleSparkProgram(rdd : RDD[Double]): Long = {  
  rdd  
    .filter(_ < 1000.0)  
    .map(x => (x, x))  
  
    .groupByKey()  
    .map{ case (value, groups) => (groups.sum, value)}  
  
    .sortByKey()  
    .count()  
}
```
